AMMAN, THURSDAY MARCH 15, 1979 - RABIE TANI 16, 1399

Hussein receives Carter message AMMAN, March 14 (Agencies)--His Majesty King Hussein

today received a message from U.S. President Jimmy Carter "dealing with recent developments (in the Middle East) and the American stand regarding these developments' the Jordan News Agency (JNA) reported. President Carter also wrote to Gulf leaders about his peace mission to Israel and Egypt, it was officially stated in Bahrain today. The letters were delivered by American diplomatic envoys in Kuwait and Bahruin to the rulers of the two Gulf states. The official Gulf News Agency said the Emir of Bahrain Sheikh Isa Bin Sulman Al Khalifa also received a lener from the leader of the Palestine Liberation Organisation (PLO) Yasser Arafai relating to President Carter's Middle East

The contents of the messages were disclosed, but both Kuwait and the PLOhave opposed Egypt's peace moves, which are expected to culminate in a treaty with Israel.

King, cabinet discuss **Egypt-Israel treaty** AMMAN, March 14 (INA)-His Majesty King Husseln presided

over a cabinet meeting here today to review developments in the Middle East region following the sunouncement that Egypt and Isruel will soon be signing a bilateral peach peace treaty, and to review the far-reaching effects on developments in the area.

At the outset of the session, the King outlined the size and nature of challenges with which the Arab nation will be faced after the signing of the treaty. He said there were new responsibilities to be shouldered in the light of the new political situation and the dangerous path it will lead to.

The King stressed the need for building up Arab self-strength and maintaining Arab solidarity so as to preserve the Arab nation's rights and secure its defrace.

On the domestic front, the King called fur increased vigilance, national unity and cohesion. He also warned against passionate nr rash acts which would consume Arab strength in vain.

Relterating Jordan's adherence to the resolutions of the Baghdad summit conference, the King reaffirmed Jordan's commitment to its Middle East policy which calls for achieving a just and comprehensive peaceful settlement in which all concerned parties must take part.

He called for a full Israeli withdrawal from Jerusalem and all other occupied Arab territories and the safeguarding of Palestinians rights, including the right to self determination. The two-honr session was attended by His Highness Crown

Prince Hassan, Chief of the Royal Court Sharif Abdul Hamid Sharaf and Chief Chamberlian Prince Ra'ad Ibn Zald.

## Sadat to fly to U.S. next week to sign peace treaty

CAIRO, March 14 (Agencies)--President Anwar Sadat will fly to Washington on March 22 or 23 to sign the proposed Egyptian-Israeli Peace treaty if things go smoothly in the meantime, Prime Minister Mastapha Khalil said today.

Dr. Khalil jold Reuters: "I don't anticipate any problems, especially after the Israeli cabinet's acceptance of the treaty draft today,"

The premier said that "if there are no problems and things go normally, Mr. Sada: and myself will fly to Washington to sign the treaty either (next) Thursday or Friday."

Israeli Prime Minister Menachem Begin has said the signing could take place as early as

#### continue Demos throughout W. Bank

OCCUPIED JERUSALEM, March 14 [Agencies]--Demonstrations continued throughout the occupied West Bank of Jordan for the fifth day running today in protest against and Egyptian-Israeli peace treaty.

In occupied Jerusalem, Israeli police fired shots in the air outside the old walled city area today to disperse Arab demonstrators. At a school in the occupied Arab sector of Jerusalem, troops burst in and arrested 14 pupils, according to an Israeli Radio report,

Occupation authorities had no comment to make.

In Hebron, police used force to disperse students demonstrating through the length of the town.

The students called on merchants to close their shops and hurled stones at Israeli occupation forces. The West Bank towns of Ramallah and nearby Al Birch were at a

stration against President Carter's peace mission to the Middle East. The only people in the empty streets were young people hurning

yesterday because of what they called "insulting behaviour" to

teachers by Israeli soldiers while arresting the students. Mayors of towns on the occupied West Bank arranged to declare a day of mourning on the day a peace treaty is signed.

The agreement on a treaty was denounced by moderate as well as hardline leaders of West Bank Arabs.

Mayor Karim Khalaf of Ramallah, a noted hardliner, told Reuters: "This agreement is just a piece of paper and does not obligate other Arab nations." Mayor Fahd Kawasme of Hebron said: "This treaty does not affect

Mayor Bassam Al Shaqa of Nahlus, another hardliner declared: Palestinian people. I believe this agreement will lead to no ficulties."

## What now?

THE NOW apparently inevitable prospect of a separate Egyptian-Israeli peace treaty being signed sometime next week faces the great Arab nation with a cruel dilemma. It is not enough that we must now heighten our preparedness against provocations which the Israelis--freed from the need to man and maintain a front-line against Egypt; and cossetted by American military and economic protection-will now feel obliged to mount against their Arab neighbours and their Arab subjects. On top of this, we must determine what measures to take against an Egypt which has chosen to remove itself from the forefront of the Arab struggle for justice and place itself at the mercies of a phoney "peace" plan that will not even satisfy its own people's fervent yearning for peace with honour.

The Baghdad summit last year, which is the basis for the reinvigorated consensus from which the Arabs now confront the most serious threat to their national existence in 30 years, spelled out the need to enact sanctions against Egypt if it signed a bilateral treaty. This is not to be done out of vengeance against President Sadat, although maoy in the Arab World feel he has badly let them down, if not actually betrayed them. Nor is it done out of any animus against the great Egyptian people, who are and have always been in so many ways the physical and intellectual engine of Arab aspirations. It is certainly not done out of any desire to create the very atmosphere of division and mutual recrimination which the enemies of the Arabs are now so busy trying to foment across the length and breadth of the Arab Nation.

Indeed, as the Arab family looks today at its wayward brother, it does so more in sorrow than in anger--despite the understandable flights of rhetoric which Camp David and its aftermath have inspired. There is no one in the family who would really choose to ostracise its biggest member in this way.

But the need for some sort of sanctions exists on two levels: on the one hand, to face the harsh reality of an Arab country openly treating and dealing and trading with an Israel which continues to occupy and subjugate Arab lands and Arab peoples: on the other hand, to force President Sadat to decide where his interests really lie, and from where he really thinks he can obtain the support and help and goodwill that he will need if he actually wants to rebuild Egypt into a mighty nation standing on its own to offer true peace and prosperity to its people.

If our choice is hard, perhaps his is even harder. But choose we, and he, must.

## ARAB PRESS COMMENTARY

COMMENTING ON THE AGREEMENT reached between Israel and Egypt, AL RA'I Wednesday criticises the attitude of President Sadat who, it says, conceded everything in order to become a "disarmed policeman" whose function is to protect Zionism in the Middle East.

By concluding such a deal, the paper continues, Sadat is nurturing illusions that bistory will perpetuate his name. In fact he bas turned a deaf ear to Arab aspirations and Arab conscience which rejects bartering parts of the homeland.

It is now the responsibility of the Baghdad summit partners to deal with the new reality created by the separate peace agree-

The Arabs should suck together in order to readjust the disturbed balance of power following the setting-up of the tripartite U.S.-Israeli-Egyptian coalition which concocted this deal under the guise of peace, the paper concludes.

AL DUSTOUR says that by placing all his eggs in the American and Israeli baskets. President Sadat has turned his back on the

The present attitude of Egypt, the paper continues, is a catastrophe for the Arabs.

It is incumbent upon them to reorganise their ranks and to deal with the new facts, the paper says. The Arabs, who formulated a joint position at the Baghdad summit, are now called upon to translate this position into action, taking into consideration the requirements of the eastern front, and the burdens which countries along that front will have to shoulder, the paper

## Crown Prince Hassan explains:

## Israel's contradiction: colonisation v. 'peace

EDITOR'S NOTE: This article, by His Royal Highness Crown Prince Hassan, was published in yesterday's editions of The Guardian (London), and is being published simultaneously today in Frankfurter Allgemeine Zeinung | West Germany). It is a realistic and factual appraisal of the very real dangers to which the proposed Egyptian-Israeli treaty subjects the inhabitants of this region, particularly in the light of Israeli practices in the occupied West Bank of Jordan.

IT SEEMS that the "piecemeal peace" is at hand. Never in history were efforts to achieve peace viewed with so much apprehension by so many. This is not because those not involved in the present bilateral treaty efforts are not interested in peace. On the contrary, their desire for a just and durable peace is even greater. They know, however, that there cannot be a sbort cut to peace, that for peace to be genuine, the defences for it must be constructed first in the minds of men, that no treaty, however carefully drafted, can guarantee peace if the parties concerned do not have the necessary good faith demonstrated tangibly to all concerned. Israeli practices in the occupied territories, carried out in defiance of world opinion, show clearly that her peace efforts are yet another exercise in realpolitik.

The broad framework resulting from Camp David, full of ambiguity as it is, did not address the main issues which, inevitably, should serve as the cornerstones of any peace effort. The fact that out of the four front-line states facing Israel, three did not at all, at any stage, participate in the effort, is in itself an eloquent comment on the inadequacy and fragility of the Camp David arrangements. On the other hand, paradoxically, the three states involved in the proposed peace treaty have spent a lot of time and effort in discussing inter alia the position of the West Bank, to which none of them has, or can have, a legal claim. Nor have the Palestinian people, whether inside the occupied territories or outside, been consulted or involved in the process, although they are the core of the

As far as Jordan is concerned, it goes without saving that she has the biggest national stake in any peace effort; her total and consistent devotion to the cause of peace needs no explanations, Through the years, Jordan has steadfastly stood by the three main elements which she considers essential: (i) total withdrawal of Israel from the Arab territories occupied in June 1967: (ii) the right to self-determination under conditions of free choice for the Palestinians who are at the centre of the Middle East conflict; and (iii) the right of all states in the area to live in peace with, if necessary, guarantees of security to all parties,

of Jordan and the Gaza Strip." the

"The negotiations on the aut-

Jordan's reluctance to join the peace efforts following Camp David is based not only on her conviction that the peace settlement should be comprehensive and should embrace all aspects of the conflict, but also on a careful analysis of Israel's motives and practices in the occupied territories, which Jordan does not find conductive to a just and durable peace.

A few days ago. Jordan initiated action in the Security Council so that necessary attention is paid and adequate action is taken by the United Nations in this respect. At the time of writing, the Security Council is discussing the question of Israeli settlements in the occupied territories, with particular reference to Israeli motives underlying her action in this regard, and the significance of some West Bank resources to Israel, which play an important role in Israel's calculations as far as the peace efforts are concerned. It should be noted that any settlements established during a military occupation are in violation of the Fourth Geneva Convention on the Protection of Persons in Times of War. The United States Government fully supports this position, and has so declared publicly on several occasions. In defiance of international law and practice, and disregarding unanimous world opinion, Israel has continued to establish more such settlements. She has continued to pursue her policy in this regard even during the time sne was

actively engaged in the so-called peace negoti-

There are 77 Israeli settlements on the West-Bank, with a budgeted plan for future expansion in 1979. In particular, Israel has been concentrating satellite housing estates in and around East Jerusalem, sheltering some 76,000 persons. In the West Bank, of its total area of 550,000 hectares, some 148,866 hectares, or 27.1 pet cent of the total area, have been confiscated by the Israeli authorities. The total area of settlements is estimated, at present, to be 34,748 hectares. Likewise, the total population of the West Bank is estimated to be 673,000. Already in 1978, there were 90,147 Israeli settlers. In other words, Israeli settlers already constitute 13.4 per cent of the total population of the West Bank.

in seizing the Security Council, Jordan has sought to have the international community halt the Israeli practice of establishing these settlements which add seriously to the existing impediments to peace, and to invite a United Nations fact-finding mission to go to the area. What is significant in the Israeli policy is not only the establishment of these settlements as ao impediment to peace, but also a whole gamut of administrative and related measures intended to diminish the influence of the Arab majority transforming it into malleable Bantustan communities dependent on Israel.

Ever since the occupation, Israel has set out to reap what economic benefits it can from the resources of the West Bank. According to available 1977 figures. Israel took about 62 per cent of the West Bank's exports and provided 90 per cent of its imports, while the East Bank provided a market for 37 per cent of the West Bank exports and only 2 per cent of its imports. Israel imposes high customs duties on East Bank exports to the West Bank, thus strengthening the link between the economies of the West Bank and Israel.

The West Bank trade deficit with Israel is financed by its surplus with Jordan, and from the remittances of West Bank workers abroad. The West Bank, under the present circumstances. offers Israeli industries an almost completely protected market which results in the West Bankers paying higher prices for Israeli goods. Similarly, these external trade conditions inhibit the development of an indigenous industrial base on the West Bank due to the protection which Israeh industry enjoys. Thus, in short, the West Bank offers Israel a captive market totally dependent on developments in Israel and incapable of standing on its own feet. With restrictive and sometimes oppressive conditions under occupation, job opportunities on the West Bank itself are on the

Forced to earn a living, West Banks tempted to seek employment in Israel. L taking advantage of about 60,000 West workers, a cheap source of labour, forming 5 per cent of the Israeli labour force. ## Israeli Cabinet

Finance Ministry.

The matters will concern military and economic questions, as well as some political questions," the spokesman added.

Mr. Carter's success was greeted with general approval hy although hardliners objected to giving up Sinai as the price of peace.

Officials said the cabinet would hold other meetings, one next Sunday, on general aspects of the treaty itself.

One issue oo which Mr. Begin has promised a cabinet debate is the scale of autonomy which will be offered to West Bank and Gaza Palestinians once the peace treaty

Advance indications have been that the Israeli government is prepared to offer Palestinians only the mildest form of self-rule.

Some ministers are believed reluctant to make this explicit for fear of jeopardising the treaty negotiations.

One issue that appeared to have been settled in the course of Mr. Carter's mission was Egypt's demand for Gaza to be given selfrule ahead of the West Bank and for Egyptian liaison officers to be stationed in Gaza.

One radio report said ministers expressed satisfaction during the cabinet meeting that Egypt had dropped its demand for liaison officers. Against this, Israel is believed to have agreed to permit Gaza self-rule to proceed ahead of West Bank autonomy if this should be possible.

On the oil question, Israel was reported by informed sources earlier today to have dropped its insistence that Egypt should guarantee a long-term supply of Sinai oil.

The sources said this was balacced by a coocession from Egypt to permit an exchange of ambassadors between the two countries 10 months after the signing of a peace treaty.

This was a mooth later than stipulated in the Camp David summit accords which laid the groundwork for the treaty.

Dr. Ghali said Egypt has agreed to sell oil purely on commercial bases and at world prices. There had been no Egyptian commitment on either the quantities of oil or the prices, as Israel had demanded, but there were Ameritinian autonomy in the West Bank can guarantees to ensure the continued supply of oil to Israel he said.

Earlier, foreign ministry

sources insisted that Egypt had made oo concessions on basic principles, such as the linkage between the proposed treaty and the creation of autonomy rule, the priority of Egyptian Arab commitmeors over the treaty and the need for a comprehensive peaceful settlemeot, which is specified in the preamble of the Camp David accords.

"Egypt bas shown flexibility on modalities, but stood firm on principles," the sources said.

The struction suc of the new Oncen-United States Agency for Inter-Alia Airport, are to be taken to national Development has prothe Smithsonian Institution in vided \$35 million and the World Washington, D.C. Physical ant-Bank 535 million. The ternainder hropologist Bruno Friehlich calls of the financing will come from them the "Airport Series." He explained that he was asked by the Department of Antiquities to ernment of Jordan, which will examine the remains while he was hold 51 per cent of the shares in in the Middle East. He has recently been working on burial

mounds in Balmain. "I wurked on it (the series) for Arah Potish Company, attended three or four days before I went to Bantein, and now I am again. working on it for a lew more days on my way back. My hope was that I could finish the job in a week or two, but it is too log. It would take more time than that, working 24 hours a day, just to sort out what we have here.

He estimates that there may be skeletal material from about 80 individuals. At the Smithsonian, pieces will first be analysed as to then owners' sex, age, and pathology. At a later stage it may be possible to differentiate between

Mr. Bruno Froehlich

the skeletal remains of Romans and local people.

Other bones from early fuonce age sites in the Jordan Valley are already on loan to the Smithsoman. Some are being viewed by the public in a major extinuion currently being held at the Museum of Natural History infed-'Races of Unitization."

A project p. underway at the Smithsonian to compare skeleral material from Jordan with that tound in Lgypt, Anatolia, and, now, Bahrain to learn about the patterns of integration and migration among peoples in the Middle East during the early bronze age. Pottery and other artifacts

will be examined in this context The idea, Mr. Froelijch said, is not to toeus on skeletal biology. alone, but to get the broad view that can be provided by archaeologists, geologists, geogtaphers and anthropologists workme together

Baltrain, he said, is "one bigburral mound in a little country." It has 100,000 buriat mounds-many of them in the path of anew road to Saudi Acabia about to the built. A good economic system and high level of technology in the early promie age is reflected by the barial mounds because they were well planned and built and obviously required a great deal of manpower to construct. The fact that severe cases of arthritis are evident on some of the ancient bones shows the soclety of that time was successful in taking care of its disabled.

The newest method used to study bones is microscopy. Small bone tragments can reveal information about a subject's numbion and age. If a complete keleton can be assembled, the teeth are studied to determine the person's age at death. Studies of a series of skeletons yields information about the life expectancy of members of its society.

Mr. Friedlich, a Dane, is about

to receive his doctorate from the University of Connecticut and to undertake post-dectoral work at the Smithsonian Institution. He worked on his thesis in Greenland and Alaska

"In North America" he said,"work in physical anthropology has been going on for 25 years. The Middle East lacks physical anthropologists. I think it important that young archaeologists here get some training in working with animal and human hones. Their discoveries can add a lot of information to the field of archaeology. There's a todof material here and most of it is in beautitul condition."

By Anthony Tucker

LONDON -- Jean Gimpel does not believe that he can save-the industrialised world -- but he believes fervently that huried in the history of the western industrialised cultures lie the technologies on which the salvation of the non industrialised world must eventually rest.

Director of a London based understanding." he says. informal group of technical experts working with the non profitmaking Acton Society Trust, be declares with sharp Gallic confidence and in rapid English: "We" are not one industrial revolution ahead of the developing world, but Iwo.

"We forget that long before the historical phase that began in 18th century England, and which we call the 'industrial revolution'. there was a crucial medieval industrial revolution that pro-

'Maybe the mechanical principles involved look simple to us but we have centuries of technological education ingrained into our culture. To the people in the millions of villages over much of the developing world at whom we must direct our help, not only is this simple technology unknown but it is beyond their immediate

"That is why we must use models, working models, superbly made models that explain through their actions exactly how machines work and how they can be made from materials that are available and understood -- like timber -- and driven by natural sources of energy, such as water. or the wind or a team of oxen."

Jean Gimpel is one of the Gimpel Fils whose father was an eminent art dealer and whose grandfather, also an art dealer. duced great industrial machines was a personal friend of Manet, throughout Europe and elsewhere Monet and many other Impreturn of the century.

His ideas are now backed by the Commonwealth Secretariat in London and by the United Nations Environment Programme (UNEP) whose headquarters are in Nairobi, and he is careful to explain that the notion of gathering information on medieval technologies and embodying it in educational models was not wholly his own.

In the spring of 1977, after a seminar he had initiated in Los Angeles at which historians had discussed and analysed the measures earlier civilisations bad taken to arrest their declines, Jean Gimpel visited New York to meet Dr. K. Standke, Director of the United Nations Office of Science and Technology.

Dr. Standke was immensely interested in Gimpel's book "The Medieval Machine" which had been acclaimed by the New York critics a few months earlier. "He

ssionist artists of Paris before the saw in its contents the possibility of great help for the Third World," says Gimpel.

> . This idea was expounded and developed by Dr. Standke and by one of his colleagues in New York, the Ethiopian scientist Dr. Aklilu Lemma, known internationally for his work oo ways of controlling the endemic disease known as bilharzia.

Jean Gimpel acknowledges that it was in these conversations that the direction and purpose of his life was changed. He saw with sudden clarity the fundamental harriers to technological transfer. the missing generations of technicians of technico-cultural understanding in the developing world and the great educational possibilities which might lie in making machines.

Dr. Lemma argues that technological transfer must take place on two levels - one involving the current technology of

industrial societies and another aimed at the relatively undeveloped village.

"It is not just a matter of preseoting relatively simple people with technologies they can understand and master" says Gimpel. "It is also a question of applying modern understanding of machines to ancient principles so that when medieval technology is transferred to peoples who have never possessed it, its efficiency is as high as modern science and technology can make it."

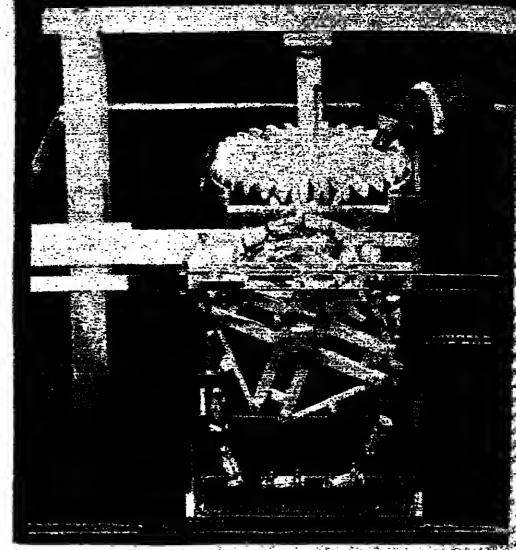

The need to upgrade the design of machines - for example, making paddle wheels or turbine blades more efficient either structurally or hydrodynamically also arises, because in many developing countries old techniworking models of basic ques and traditional technologies are often looked down upon by artisans who are already adopting Western values.

Yet the future improved living standards of the villages may depend vitally on those same artisans not only grasping the immediate importance of indigenous skills and techniques but. also using these creatively to interpret and adapt medieval rechnology to local needs and capabilities.

So what is he offering the world? He is offering the camshaft, the rocker, the screw, the principles of wooden gear wheels, of pulleys and levers, the undershot water wheel, the overshot wheel, the turbine principle used in medieval mills in central Europe, the tethered barge mill. the notions of long shafts and belt drives, and of vertical axis wind machines and simple generators.

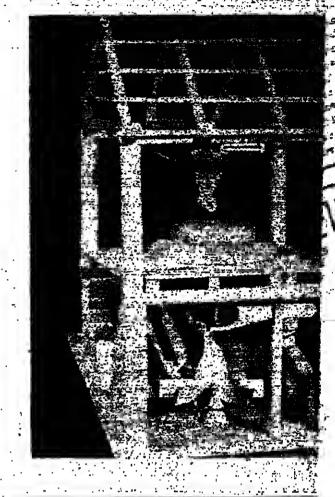

And he is offering these in the form of models of traditional systems, some of which may already be known if not fully understood, by the craftsmen whose skills may eventually put them to work in the remote and bungry villages of the developing world.

What is more, and perhaps more important, Gimpel knows that this is just a beginning. UNEP has ordered 30 sets of models for distribution in experimental training programmes-a demand which will be difficult to meet because be is an ideas man, not a mannfacturer. Eventually others must take over the whole process of model building and the production of educational material.

selected his second-best spade rather than the normal fourth-best. East wisely refrained from covering and dummy's ten won the trick.

Declarer cashed the ace of clubs and West discarded a diamond. This was most unwelcome news, for while declarer could pick up the club suit by finessing the ten. he had no sure reentry to dummy. His only hope was to lind a defender with a doubleton king of spades. So declarer finessed the ten of clubs, cashed the king, and theo cashed the ace of snades. When the king did not drop, declarer had no way of coming to twelve tricks. With the belp of an eod play he scraped together two spades, two hearts, three diamoods and three clubs for down two.

Had declarer realized the possibility of a 4-0 club division, he could have guarded against it. He needs only two tricks in spades, as long as be takes six club tricks. And he can guarantee those club tricks, providiog be keeps an entry to the table to overcome any evil club distribu-

Observe the difference if declarer wins the ace of spades at trick one. Now a club to the ace reveals the distribution, and declarer can finesse the ten of clubs and clear the kiog. Then all he has to do is force an entry to dummy by leading a spade to . To make sure. the queen-jack, and the conrtner would not tract comes home in grand

## Students from afar

STUTTGART-A wide range of youth exchange programmes exist to foster international understanding in Europe, but an organisation in Stuttgart, West Germany has gone further afield to invite 56 boys and girls from a school in Lima, Peru, to spend three months with a German family. They all learn German as their first foreign language and are here seen to the snuwbound Black Forest where they attended a one-week course to acclimatise themselves to life to Germany. The scheme has been run since 1977, (1)al) (thoto)

EEC leaders agree on

goals for saving energy

ST. GEORGE'S. Grenada, March 14 (R) -- White shirts and other improvised flags of surrender fluttered over this Caribbean island's police stations today after a dawn coup headed by leftist opposition leader Mr. Maurice Bishop.

Most of the cabinet ministers first left-wing programme for and members of ousted prime minister Sir Eric Gairs s secret police -- known as the mongoose gang -- were under arrest today. Mr. Bishop's new revolutionary government appeared to be firmly in control of the country.

In the capital armed men patrolled the streets last night as a curfew was clamped on the island. The airport was closed. Mr. Bishop, opponent of the Gain government for 20 years, declared himself prime minister.

Yesterday's dawn coup. in which the radio station and army barracks were swiftly seized, came only a few hours after Sir Eric flew to New York for talks at the United Nations. Sir Eric had led Grenada for 30 years almost without interruption.

It was the first coup in the English-speaking Caribbean. The island gained its independence from Britain five years ago.

Mr. Bishop, a British-trained lawver, leads the New Jewel movement which put forward the their houses and listen to radio

Common Market countries have

resolved to cut their oil con-

sumption by 25 million tonnes this

year to 500 million tonnes to meet

#### Emergency meeting

Caribbean foreign ministers are expected to meet in emergency session in Barbados today to discuss the implications of the coup.

Although ministers will almost certainly condemn the use of force to take over power in the Caribbean island, there seems little they can or will want to do to reverse

Sir Eric has warned against allowing the coup to succeed because it might spark off imitations elsewhere in the Caribbean.

With a number of vociferous and highly-organised extreme left-wing groups in the Caribbean. this thought is likely to be foremost in the foreign ministers minds when they meet here.

The coup will also give added weight to recent discussions about a form of joint defence for Barbados, St. Lucia and St. Vincent. The talks up to now have been concerned with protection of fisheries and steps to be taken against any mercenary attack following a threat of a foreignmounted coup in Barbados.

None of the Caribbean governments has rushed to recognise Mr. Bishop's new administration, although there have been favourable reactions from left-wing organisations.

Sir Eric is one of the most controversial political figures in the Caribbean.

Sir Eric claimed that the coup was staged because United States intelligence agents were on the island seeking militants to whom

illegal submachine guns had been shipped by Grenadians in the United States.

with threats and accusations from all sides. Morocco, reacting to the unrelenting guerrilla actions of the Algerian-backed Polisario Front, has decided to set up a "defence

against attackers. Though Algeria is preoccupied

State Security (BOSS) and a central figure in South Africa's big government scandal, said today police have confiscated his passport. There was no explanation for the move from police.

PRETORIA, March 14 (R)-General Hendrik

Van den Bergh, former chief of the Bureau of

It was the latest twist in a growing scandal over the huge misuse of secret government funds by the now-disbanded Information Department, in which retired General Van den Bergh has been deeply implicated by a judicial inquiry.

The general said he was awakened at his home soon after midnight by General Carl Zietsman, former head of security police, and a police sergeant. They presented him with a letter from Interior Minister Alwyn Schlebusch demanding the immediate handing over of his passport and any other travel documents, he said.

General Van den Bergh flew to Paris last week for a secret meeting with Dr. Eschel Rhoodie, fugitive former chief of the Information Department. According to the general, Dr. Rhoodie had threatened to expose damaging government sec-rers unless his name was cleared. The government has already ordered withdrawal of Dr. Rhoodie's passport but has not yet been able to enforce the

The judicial inquiry, headed by Judge Rudolf Erasmus, suggested that criminal prosecution be considered against Dr. Rhoodie and others involved in the scandal. So far, however, the only persons to appear in court have been editors and

reporters accused of contempt of the commission, which is still sitting, by publishing further dis-

But the Transvaai Province attorney-general refused to charge General Van den Bergh himself with contempt—he had called the Erasmus Commission a farce-saving the result could be damaging to the state.

The general last night denied reports that he was planning a further trip abroad to see Dr.

Mr. Josias Van Zvi, a husinessman who accompanied the general to his last meeting with Dr. Rhoodie, said his passport had also been seized by police early today. The government has now ordered the seizure of seven passports since the scandai erupted last year.

General Van den Bergh announced last week that he had persuaded Dr. Rhoodie not to sell to the press 41 tape recordings and a number of documents said to "blow the lid" off the Information scandal Mr. Van Zyl said that as part of the deal, he had taken Dr. Rhoodie on his staff as salesman for a new metal-cutting process.

Despite this, the Rand Daily Mail and other newspapers have published lengthy interviews with Dr. Rhoodie. He claimed that former prime minister Mr. John Vorster--now state president-and members of the present cabinet were aware of the Information Department "slush money" projects and tried to bush them up.

## European Parliament debates Greece-EEC, aid to Turkey

14 (R)--French communists in the European Parliament yesterday voiced strong opposition to the porspect of Greece joining the Common Market by 1980.

Communist member Mr. Jacques Eberbard said a survey showed that 52 per cent of EEC citizens lived in deprived conditions. "Can the Greeks really believe that what has been disastrous for the present members will be good for them? We believe these things will worsen if Greece became a member," he said.

Other political groups in the parliament spoke our in favour of a report from Italian socialist Mr.

STRASBOURG, France, March Guiseppe Amadei welcoming association agreement with the Greek membership.

Italian christian democrat Mr. Mario Schelba said that hy joining the Community, Greece would reinforce freedom in Europe. Concern that its membership would make it harder for Turkey eventually to join was unjustified. he added.

For the socialist group, British parliamentarian Mr. Bob Edwards said that by its big trade deficit with the rest of Europe. Greece had already made a contribution to the Community.

In a separate debate, parliamentarians spoke in favour of Turkey getting a better deal m its

EEC, backing a report on relations between the two sides from West German christian democrat, Mr. Jochen van Aerssen.

Mr. Hans-Edgar Jahn of West Germany said the recent rush of international aid to Turkey because of its huge economic problems showed that at last its importance was being recognised.

Turkey has criticised a draft negotiating document produced by the EEC Commission suggesting limited aid and concessions on tariffs and vocational training for Turkish workers in the Com-

Sahara

#### Standoff continues over Western

Formia, with its dry and sunny

Government was announced only last week. Informed diplomats believe that beither Algeria nor Morocco really want a war.

Observers in Rahat and Algiers feel Morocco's current belligerence is not a build-up to a showdown, but a new effort to prompt Algeria to open talks on the dispute, now in its fourth year. The situation has been

deteriorating recently for Morocco. At the last United Nations General Assembly, 88 countries voted for a resolution mentioning the Polisario and reiterating the Sahraui people's right to self-determination.

Last January, the Polisario won a considerable psychological victory when it forced the Moroccan authorities to acknowledge an attack on the south-Moroccan town of Tan-tan. The attack caused little damage

men who visited it recently and other reliable sources. They said the Polisario guerrillas suffered beavy losses during their retreat through Moroccan territory. But it clearly forced Morocco's

to the town, according to news-

King Hassan to react. He first called on the new Algerian president, Mr. Benjedid Chadli, to open talks.

The only answer was in a message from the then foreign minister, Mr. Abdelaziz Bouteflika, which reiterated Algeria's support for the Sahraui cause and the Polisario Front.

The king went to Paris for talks with France's President Valery Giscard d'Estaing. But be apparently came back disappointed, if not angry.

Reliable sources in Rabat said the king asked the French president to mediate between Morocco and Algeria hut was turned down.

Morocco cannot draw any comfort either from the attitude of Manritania, which jolked the Western Sahara venture in 1974, but has now practically pulled out of the war.

Mauritania had been hit hard by the Polisario, most of all by the crippling of its vital iron ore exports which have to travel through hundreds of kilometres of desert controlled by the guerrillas.

The military administration which ousted President Mokhtar Ould Daddah last July 10 immediately pledged to bring an end to the war. Recently it has hinted it might pull out alone, if other nartners were "blocking" the chances of peace. The hint to Morocco was clear.

The Polisario, who proclaimed a ceasefire in Mauritania only two days after the coup in Nonakchott, is now criticising the new leaders for not responding "concretely" to its peace move.

Algeria has recently come out in support of the Polisario position and President Benjedid's last message to Mauritanian leader Colonel Mustafa Ould Saleck fully endorsed the Polisario criticism.

Some here speculate that King Hassan's new show of determination is designed to impress on Algeria the support he enjoys in his country, and the need to seek a way ont of this protracted dispute.

It is believed the king, like the Algerian leaders, would prefer a political solution. But the two sides do not appear to have come any nearer to each other.

Algeria, for the time being, does not seem likely to heed Morocco's call. Beyond its well-published political principles, Algeria's thinking bas long been that time is in favour of the Sahraui, and that Morocco will eventually give up.

## King Hussein appeals for 'understanding and genuine support' of occupied Arabs

AMMAN, Murch 15 IJNAH-His Mujesty King Hussein appealed to all nations today to show understanding and give genuine support to the plight of the Palestinian people, now suffering under the yoke of Israeli occupation in the West

Bank of Jordan and Gaza. The appeal coincided with the current United Nations Security Council debate, at Jordan's request, of Israet's colonisation of the occupied Arab lands and the illegal measures it is taking to change the character of the occupied territories.

The King said that the establishment of Israeli settlements "has increased at such a scale and pace, particularly in Jerusalem and around it, that it threatens to destroy the cultural character of the occupied Arab areas and destroy the bases of a just

He called up the Security Council members backed by the unanimous witt of the international community, to stop the deterioration, save the occopied areas, their people and their basic human rights so that some measure of hope in an eventoul, just peace in the Middle East may remain."

The king's statement said: "The Security Council is considering the serious threat to the physical and demographie character of the

result of the creeping annexation by the laraeli occupation authorities and the establishment of Israeli settlements in them."

## In most violent West Bank clash

## Israeli troops, armed settlers kill

OCCUPIED JERUSALEM, March 15 (R)--israeli occepation forces and armed Jewish settlers fired on West Bank demonstrators today, killing two Arab students, one a gitt in her teens. The demonstrators, mostly high school students, harled stones and burned tyres in the West Bank town of Halhul to profest against the newly agreed peace treaty bet-ween Egypt and Israel.

Eyewitnesses said the Israelis opened fire on the demonstrators when they ignored shots in the air. One other male student was slightly wounded

Announcing the casualties, an Israeli army statement said: "Soldiers and civilians were caught in a group of hundreds of rioters. In the course of the demonstration shots were fired by soldiers and

The announcement did not identify the civilians, But military sources said they were Israelis from the nearby Kiryai Arha settlement complex. The Israeli military governor

and the area commander were ordered to Halhul to investigate. It was the most violent incident in a series of Arab protest demonstrations around the southern seefor of the West Bank, Students blocked roads and stoned cars in Ramallali, Beit Jala, Hebton and

In Hallial, civic leaders protested that the entire town council had been placed under arrest during the night.

In a message to Defence Ministet Ezer Weizman, just before he left for the United States today. councilmen said they had been called to the office of the military governor and told to prevent demonstrations,

After the warning, the councilmen said, they were detained for eight hours in the courtyard of military government headquarters.

The Halhul victims were named as Masri Al Anani, a 21-year-old male student, who died instantly. and 17-year-old Miss Rabiah Shalalda, who died in hospital in Hebron.

A third person, Yusuf Saleh Badawi, was injured

At Beir Zeit University near Ramallah, students raised the Palestiniao flag.

Demonstrators denounced the treaty, agreed between Egypt and Israel on Tuesday with the help of Palestinian problem untouched. West Bank indignation was Sunday.

fuelled by reports leaking ou through official sources in occupied Jerusalem that the formuta finally agreed for the treaty put little pressure on Israel to push ahead with a Palestinian self-rule

According to these reports the two sides agreed in a letter accompanying the treaty that Israel should proceed with implementing autonomy "as expediti-ously as possible" after an agreement was reached.

West Bank leaders have refused to take any part in self-rule negotiations, especially after signs emerged that the brand of autonomy envisaged by Israeli authorities would give them little real power. The chances of agreement on

self-rule are consequently remote. Despite their rejection of the self-rule plan, West Bank leaders have charged that Egyptian President Anwar Sadat betraved them by failing to commit Israel to the

Briefing foreign diplomats today. Foreign Minister Moshe Dayan said he expected the United States to exert strong efforts in pushing forward the

self-rule programme. Mr. Dayan said Israel would keep the promises it made on this subject at the Camp David summit accords last September. Arah opponents of autonomy argue that the accords are vague enough for Israel to keep Palestinian powers

to a minimum. But Israeli hardliners claim that even a weak measure of autonomy President Carter, as a separate for Palestinians is too big a risk to peace which would leave the take. The subject will be given a full airiog in the Israeli cabinet on

## Economic sanctions against Egypt urged by Arab hardliners

BEIRUT. March 15 1R1--Arab its feasibility..." pressure for economic sanctions against Egypt if it signs a separate peace pact with Israel mounted

tragi Foreien Minister Saadoun Hammadi was quoted in an interview published in Baghdad today as saving Arab economic and political sanctions would be sealed its separate peace with Israel.

The Baghdad Arab summit resolutions "will be implemented immediately the capitulationist treaty is signed with the enemy." Dr. Hammadi told the weekly magazine Alef Ba'. "These resolutions are designed to safeguard the Arabs' higher national inter-

The Baghdad summit, held last November, called for punitive economic measures to be taken against Egypt if it signed a separate peace agreement with tsrael and for the Arah League headquarters to be transferred from

Iraq announced yesterday it would call for a meeting of Arab foreign and economy ministers to discuss sanctions against Egypt. Kuwaiti newspapers today called for the immediate impos-

ition of Arab saoctions on Egypt. The Al Anbaa newspaper said that imposing sanctions was the minimum reply to the Egyptian-Israeli treaty.

"Any tolerance or procrastination (in imposing the sanetions) is tantamount to real connivance with Cairo, Tel Aviv and Washington...

Kuwait's Al Rai Al Aam newspaper urged Arab states to act before the proposed treaty was signed. It also called for moving Arab League headquarters to Riyadh, capital of Saudi Arabia.

Another newspaper, Al Qabas, said "an American-Israeli-Egyptian alliance will emerge in weeks or months after signing the treaty... the alliance will embark oo military operations to reinforce its prestige and prove

In Rome, a senior Lihyan official condemned the proposed Egypt-Israel peace treaty today as

Ahmed Shahati, head of the Foreign Relations Committee of

"It is not a real peace, in that it of the Palestinians," Mr. Shahati

"That gives us the right to undertake whatever action against the alliance between Egypt and

Palestinian leader Yasser Arafat has already called for the Arab oil weapon to be turned against the Egyptian president.

Without directly criticising the newspapers today attacked the projected Israel-Egypt treaty saying it would not bring real peace to the region.

One Saudi newspaper, Okaz, said the U.S. peace terms ignore the Palestine Liberation Organisation and thus would not bring

diplomats in Beirut. The proposed Egyptian-Israeli peace treaty will isolate the Egyptian armed forces and allow Israel to concentrate its army along the frootiers with Syria and

Jordan, the Saudi newspaper Al Jezira said today. The proposed treaty posed great dangers for the Arabs, Al Jezira said, calling on Arab states opposed to a treaty to adopt a new

their views. The Mecca-based daily An

Nadwa called in a front-page editorial for the immediate implementation of resolutions adopted by Arab states at the Bagbdad summit.

## Hoveyda goes on trial

for his life in Tehran TEHRAN, March 15 (R)-Former Iranian Prime Minister Amir Abbas Hoveyda, right-

hand man of the gusted Shah for 13 years, went on trial for his life today before an Islamic revolutionary court, prison officials said. The 60-year-old politician, the

most prominent detainee from the Shah's 37-year rule to be tried, was called from his cell at mid-

according to local newspapers.

today that a second exchange of prisoners bet-

He denied charges on 17 counts ranging from massacres to treason and espionage for the west, Slumped in a chair with a cardboard placard bearing his

name, he said he acled on the

Amir Abbas Boveyda

The prosecutor, in an indictment read before the court at Tehran's Qasr jail, said evidence to support the 17 charges had been given by witnesses.

The charges included treason, sacres, murder, torture, violation

among 11 people executed on

Tuesday as traitors. Among other evidence which the prosecutor said supported the charges were documents seized from the Shah's secret police organisation Savak, and the prime minister's office.

In his defence, Mr. Hoveyda said that although the head of Savak was an assistant prime minister, the latter dealt directly with the Shah and as premier he was not responsible.

Mr. Hoveyda indicated he was reody for a similar sentence himself, "if I am going to be con-victed, I am ready," he said.

## Sanjabi denied

(R)--Iranian Foreign Minister Karim Sanjabi offered his resignation to Premier Mehdi Bazargan four days ago but it was rejected, a reliable source close to Dr. Sanjabi said today. The government today denied that Dr. Sanjabi, 47-year-old head of the National Front Party, hadresigned. "I deey that," Government Spokesman Amir Entezam told n press conference, without elaborating, when asked whether

## Sudan, Vietnam rap Israeli actions in occupied territories

UNITED NATIONS, March 15 (R)-Sudao said last night "oew forces and alliances" were arising in the Middle East which would eventually overshadow the Israelis' military preponderance. Their military might may not prove to be of a lasting nature in the light of changing circumstances, which characterise the course of events in the Middle East at an accelerating pace," Ambassador All Sahloul of Sudan told the Security Council.

Speaking in the council's continuing debate on the situation in the occupied Arab territories, Mr. Sahloul, current chairman of the Arah group at the U.N., said Israel was "systematically and releotlessly pursuing a policy of establishing Jewish settlements. It was also changing the status, geographical nature and demographic composition of the territories. The Israeli authorities should bear in mind that time was not on their side and that "new forces and alliances are rising in the region which will eventually overshadow the present military preponderance that they seem to have

Amhassador Ha Van Lau of Vietnam said Israel continued to pursue a policy of exprepriating Arab land, making use of terrorism and torture against Arab protests. He said any attempt at a settlement which ignored the hasic national rights of the Palestinians and the full sovereignty of the Arab peoples over their territories and was made without the participation of all Arab countries and the Palestine Liberation Organisation could only run

TERRAN, March 15 (R)--North Korean Foreign Minister Ho Dam will arrive in Tehran tomorrow at the head of the first communist government delegation to visit Iran since last month's revolution, the North Korean emhassy announced today. The embassy said Mr. Ho, also one of North Korea's five deputy premiers, will have talks with tran's religious leader Ayatoltah Ruhollah Khomeini, Prime Minister Melidi Bazargan and Foreign Minister Karim Sanjabi during his

NAIROBI, March 15 (R)-- A high-level Ethiopian delegation headed by Foreign Affairs Chief Lt. Col. Berhanu Bayeh today lett for North and South Yemen. Addis Ababa radio monimred here said. Border clashes between the two Yemens ended this week with both agrant to complete troop withdrawals. At Addis Ahaba airport today Lt. Col. Berhanu said that what happened in the region was of concern to Ethiopia and hoped the delegation would get a clear picture of the situation, the radio said. It said he would deliver messages to both presidents from Ethiopian Head of State Mengistu Haile Mariam.

ROME, March 15 (R)--Greek Catholic Archbishop Hilarian Capucci, jailed by Israel in 1974 for 12 years as a gun-runner for Arab commandos and released three years later after Vatican intervention, will soon meet Pope John Paul, officials said today. Monsignor Capucci, former patriarchal vicar of the Greek Carholic Melchites in occupied Jerusalem, was freed after the Vatican promised Israel he would not return to the Middle East. The prelate was then assigned as a visitor to Melchite Communities in Latin America but went to Syria this January at the invitation of Yasser Arafat, leader of the Palestine Liberation Organisation. An official of the Latio Patriarchate of Jerusalem, Monsignor Ibrahim Ayad, told reporters in Rome Monsignor Capucci would "clarify with the Pope his open support for the Palestinian 

Shah's orders and was part of the monarch's system of government. "If I am responsible, everyone is responsible," he was quoted as saying. "We were all living under the same regime."

espionage "in favour of Zionism and the west", heroin snuggling in France, giving Iran's mineral resources to foreign countries and revenues to the Shah and Empless Furah, "expansion of the imperialistic policies of Britain and the United States in Iran", plotting with the western military pacts CENTO and NATO "to wipe out Palesnoians, Iranians and Vietnam". censorship, mas-

of hasic freedom, and corruption. The prosecutor said that among the witnesses who had given evidence to back the charges were two former radio and television executives, Mahmoud Jaffarian and Parviz Nikhkah. They were

## Come together

THERE IS A pressing need for the convening of an emergency Arab summit conference to confront the new realities and face up to the new challenges in the Middle East in the light of an imminent Egyptian-Israeli separate peace treaty.

The Baghdad summit last November produced many positive results, at a time when the Arab World was passing through one of its most trying periods. It staked out a new common ground from which the Arabs could face up to the very real challenges to their unity, will and resolve.

But that summit was based on the premise "What if?..."--the "if" being the question of how far President Sadat was prepared to go in pulling his country back from the common Arab front. This has now become all too clear. And, in the interval since Baghdad, a host of circumstances have intervened to fill in the outline of the very grave threats and strategies which are now aimed at undermining the Arab position. At the same time, the Iranian revolution has unexpectedly produced potentially far-reaching effects both on the mood and the geopolitical position of the entire Middle East region.

However these events may have served to galvanise Arab sensibilities on the crucial issues facing us, we would suggest that a new Arab summit should not be a platform merely for the expression of our common disappointment, even outrage, at the provocations contained in the Egyptian-Israeli-American settlement formula. For one thing, there are enemies forever lying in wait to prey upon what they can portray as "extremist" or "aggressive" behaviour, in order to exercise their own extremist and aggressive intentions against us.

Better to focus on the continuing suffering endured by those forced to live under an Israeli occupation that is a living reality whatever is written on the pieces of paper Messrs. Begin, Sadat and Carter may choose to sign. This is the reality of the oppressed Palestinians living under military rule in their own land. It is the reality of an Israeli expansionist policy that won't stop because of a few concessions in Sinai.

This is the exercise of appealing to the humanitarian conscience of the world in which Jordan is currently engaged -- through His Majesty King Hussein's statement vesterday, through Crown Prince Hassan's article published on this page yesterday, through the present U.N. Security Council debate, instigated al Jordan's initiative, on Israeli policies in the occupied territories.

The international community may or may not be impressed by another outpouring of Arab rhetoric. But appeals to the world's conscience, based on a demonstration of Israel's illegal and inhuman practices, seem to have a better chance at least of being heard.

## ARAB PRESS COMMENTARY

IN THE WAKE of the Egyptian-Israeli agreement to the latest U.S. peace proposals, Jordanian papers' Thursday editorials comment on His Majesty King Hussein's address to the cabinet meeting yesterday.

AL RA'I says that His Majesty's address serves as a reminder that Arab rights cannot be achieved unless they are backed up by military strength. Jordan insists, the paper continues, that peace can only be achieved through a comprehensive senlement that guarantees the participation of all parties concernd; a settlement which ensures the Israeli withdrawal from occupied Arab territories and the recognition of the Palestinians' right to selfdetermination. Jordan's stand, the paper adds, derives from its commitment to the resolutions of the Baghdad summit. "Our nation must find a way to frustrate the new plot." the paper concludes.

Commenting on the same subject, AL DUSTOUR says that in the wake of the recent Egyptian-Israeli accord, the only spin-off benefitial to the Arab cause is adoption of a unified Arab course of action based on self-reliance. Following Egypt's exit from the ranks of the confrontation states, the paper adds, Israel will probably pick a quarrel with the countries of the eastern front in order to sap Arab strength before it bas had a chance to become fully developed: or it might resort to psychological warfare with the object of sewing disunity among the Arabs.

The exit of Egypt from the Arab fold need not scare the Arabs: rather they should stick together in order to frustrate the enemy's plans. Ultimately the Egyptian people will not abandon their history, nor will they shun their Arab brethren, the paper con-

## Explosion death toll reaches 16

By Majeed Usfour Special to the Jordan Times

AMMAN, March 15-Yesterday two more bodies were recovered at the site of last Sunday's explosion at Um Al Basatin, bringing the toll to a total of 16. Meanwhile, it was reported that material damages caused by the blast were immense. The government, however, is expected to share in compensating those who lost their homes or children.

In an attempt to throw light on reasons for the hlast, a technical military team has been set up in order to investigate the circumstances surrounding the inci-

A probe carried out by the Commissioner of the Govemorate will concentrate on whether any personal motives were behind the blast. In the absence of any such indications, the incident will be considered to have been purely an accident.

At the same time, experts, who have estimated the amount of explosives at 15 tons, believe that fire alone could not have caused such a huge explosion. It is possible for fire to cause gunpowder to -burn, but the question puzzling experts is what was it that caused the detonators to go off in one huge explosion.

Palestinian who went blind, apparently for psychological reasons, after years of imprisonment in an Israeli jail, was among 76 Palestinian prisoners

## Alia crash investigation continues

AMMAN, March 15 (J.T.)--The investigation is continuing into the crash of Alia's flight 600 at Doha Airport in Qatar early yesterday morning in which 45 people were killed. No official statement was made today by Alia on progress in the investigation.

However, it was learned that Alia may begin to fly the bodies of those killed in the tragedy to Amman on Friday afternoon.

#### APC housing estate inaugurated by Prince Hassan

AMMAN, March 15 (JNA)-His Highness Crown Prince Hassan today inaugurated the new housing estate adjoining the Arab Potash Company (APC) project near the southern tip of the Dead Sea. Attending the ceremony were the visiting Polish Minister of State for Planning, the Minister of Public Works, Sa'id Bino, and several officials and members of diplomatic missions. In addition to Prince Hassan, who emphasised the importance of the potash project in his speech. APC board chairman, Ali Khasawneh, and the president of the Korean firm that executed the project, Shin Seung, also spoke.

His Majesty King Husselp chairs Queen Alla Fund board of trustees meeting Thursday. Princess Basma, to his right, reported on the

## King chairs fund meet

AMMAN, March 15 (JNA)-His Majesty King Hussein, Honorary president of the Queen Alia Jordan Welfare Fund, today chaired a meeting of the fund's board of trustees to review its various achievements since 1977.

In an address to the board, the King underlined the importance of the fund's role in improving living conditions and promoting social development in the community. The King pledged to grant all possible support to the fund's work and called on the public and private sectors to join in the fund's

In reply. Princess Basma, the board's president, thanked the King for his active support of the fund and its activities and presented a brief summary of the fund's achievements and future

The Oueen Alia Fund was established in 1977 in memory of the late Queen Alia. The fund currently sponsors a social services centre for Bedouins in the Badia regions, a juvenile rehabilitation centre, centres for the care of mentally retarded children and training centres for making tradmonal handicrafts.

## Coming & Going

Syrian civil aviation team ends visit

AMMAN, March 15 (J.T.)-The Syrian side in the Jordanian-Syrian joint committee entrusted with working out unified air transport regulations left for home today. A draft of the new regulations to be applied in both countries was worked out during the week-long meeting, and this will be referred to a joint civil aviation committee at its forthcoming meeting here, a spokesman for the Jordanian Civil Aviation Directorate said today. Air navigation regulations recently adopted by Jordan were also discussed so that Syria can look into implementing similar regulations.

#### Civil aviation director off to London conference

today to chair the conference on Arab airports which is scheduled to start there today. Taking part in the three-day conference are directors of civil aviation departments in Arab states as well as representatives of specialised regional and international organisations. Safety measures and modern facilities used at airports are among subjects on the agenda for discussion.

Health minister returns AMMAN. March 15

(JNA)-Minister of Health Abdul Ra'ouf Al Rawabdeh returned here today after taking part in the Arab Health Ministers' Conference in Riyadh. Among the various resolutions adopted at the conference, were: approval of a national relief plan for disasterstricken regions: granting aid to health services in Somalia, Lebanon, Mauritania, Djibouti, Eritrea and to the Palestinian Red Crescent Society; coordination among Arab states in combating contagious diseases, and working out a joint policy for pharmaceutical industries, the Minister said. The conference yesterday called on the . Director of the World Health Organisation (WHO) to follow up the implementation of its decision last year concerning the condemnation of "Israel's oppressive policies" in the occupied Arab territories. The ministers taking part in the conference also decided to raise the issue of health conditions in occupied Arab territories at next May's WHO conference in Geneva.

The herd of red deer on the Rahoy estate in Scotland, where a commercial deer farm has been established.

Mike Alexander feeds the herd at Rahov Deer Farm in the Scottish Highlands, where he is farm mamager.

## source of meat? A new economical

by Ray Perman

LONDON -- A novel experiment being carried out in the Highlands of Scotland could lead to a new type of farming with immense? potential for areas with poor land and inhe-pitable climate.

The Highlands and islands Development Board, an agency set up and financed by the British Government to improve the economy of the sparsely populated north and west of Scotland. is attempting for the first time to farm deer on a commercial scale.

The appeal of the venture is obvious. Red deer are name to the mountains of the area and runwild in large herds. They can survive the coldest winters and can pick a living from the meanest vegetation, eating bracken and heather where there is no grass and grazing where even sheep a herd which can supply breeding

would starte.

Ye! red deer meat is rich and highly valued. It now commands prices above those for top quality beef in both British and other European markets

The combination of those two toctors makes the prospect of deer farming attractive for areas such as the Scottish Highlands where much land is at present unproductive. But the Highlands board recognises that many problems have to be solved before the experiment can be recommended to private landowners.

It decided in March 1977 to buy the Rahoy estate on the Atlantic coast of Scotland to set up a commercial deer farm. The purpose is two-fold -- to carry out in practice what up to now has mostly been theory; and secondly, if the experiment proves a success, to build up

hinds to other farms wanting to begin raising deer.

Rahoy is typical of many Scottish estates. Although there are some grassy fields on the low land around Loch Teacuis, a long, narrow sea inlet, most of the estate's 1540 hectares is hill land which is badly drained and has only patches of grass among rocks and heather.

Until 1974 the estate was farmed for sheep and cattle but its poor quality and remoteness from markets made it uneconomic. The Highlands board brought it for £275,000 and has so far spent another £80.000 on improving and adapting buildings, draining and reseeding the lower slopes and erecting 2 metre high deer fences. Over the next five years another £180,000 will be spent.

The initial breeding stock has been built up from calves supplied

by private landowners from all over Scotland -- including Britain's Royal Family, which has a large Highland estate at Balmoral. The animals have to be caught on

the hills within a few days of birth

so that they can be domesticated. Over the past two summers 170 deer have been caught and reared by hand in the farm buildings at Rahoy, but the target is to build up a herd of between 500 and 600. Calves are weared at about three months and then kept on lower ground and given supplementary feed to see them safely through

their first winter. By the age of 15 months they should reach a live weight of 65 to 70 kilograms. Stags would be slaughtered for meat at this age. but the hinds be kept for breeding and should produce one culf each

professional iarm manager chosen by the Highlands board to run the project, believes that it will be five years before any conclusions can

"I would like to do it faster, but the deer will not let me." he says. "We just do not know what detailed problems are going to be raised in managing a herd 500 strong in farming conditions."

Among the answers he will be looking for are the numbers of animals that a given area of land can support (as compared with the numbers of sheep or cardes, the feeding requirements of adult hinds to keep them in peak condition for regular calving, the best time for weaning caives, the best types of supplementary feeds and the best way of confining and handling the deer.

Deer farming is practised on a Mr. Michael Alexander, the commercial scale in only one other

facts of the case are fispute. It is up to you ide whether East or was guilty of was guilty of the contract of sades.

phi: bidding is a vital of evidence. After had shown a balanced of 13-15 points, South luced his second with his unbalanced g, he preferred to play suit cootract. North Take and South went to

est led his fourth-best East woo the ace and ed the seven. Oo this South followed with the West took the king

and now had to decide whether declarer had started with three hearts and one diamond the had shown oine cards in the black suits in the auction), or with two cards in each red suit. He decided on the latter and shifted to the queen of diamonds, Declarer was quick to seize the opportuoity by coveriog with dummy's king. East won the ace, but now he had no way to get back to his partner's hand for heart rull.

should have known that South was probably 3-1 in the red suits, for had he been 2-2, he would have rebid three no trump at his third turn instead of four spades. West argues that since virtually all of South's strength was in the black suits, he would bid the same way regardless of his red-suit distribution. Have you reached a verdict?"

"East maintains that West

"We have, your honor. The major share of the blame lies with East, for there was no way for West to know dcclarer's distribution.

"Defense is a difficult art. aod you should make every effort to solve partner's problems for him. East had the opportunity to direct the defense, but he failed to scize

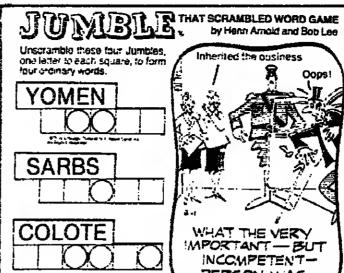

"After winning the first trick with the ace of hearts. East should not return a heart immediately. He should first cash the acc uf diamonds!

"When East oow returns a heart, it is crystal clear to West that he cao do no better than win the king of hearts and continue a third round. East's ruff then defeats the contract."

## Shocking achievement

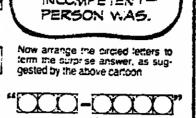

MUNICH - Munich Surgical Research Institute has developed a new device that uses shock waves to crush kidney stones. It does so without touching the patient's body and leaves sugrounding tissue unharmed. The device was developed in conjunction with a leading aerospace campany and has proved successful or experiments with laboratory animals. It is now to be converted for use on human patients, says Professor Walther Brendel, head of the Institute, which is the leading research facility of its kind in West Germany. (Dal) phote:

BRASILIA, March 15 (R) -- General Joao Baptista Figueiredo becomes Brazil's new president today, promising to usher in a new era of democratic free-

The 61-year-old cavalry officer takes over from General Ernesto G.sel, who initiated cautious political reforms aimed at eventually restoring civilian rule in this nation of 115 million people after 15 years of right-wing military

On the eve of his inauguration, however, the country was troubled by serious strikes that reflected the economic problems

General Figueiredo has prom-

## Slams arms race Pope issues his 1st encyclical

(R)--Pope John Paul, in his first encyclical letter, today denounced injustices caused by capitalism and restrictions imposed by atheistic regimes. He also criucised the arms race and renewed church appeals that mnney spent on weapons should go to help feeding the world's poor instead. His encyclical, "Redemptor

Hominis" (redeemer of man), was a strong defence of the individual and voiced strong doubts that mankind was becoming morally better as the world made economic progress.

His 24.000-word message summed up the 58-year-old Polish Pope's reflections on the role of the church and in the contemporary world.

The pope denounced wide differences between rich and poor and added: "So widespread is the phenomenon that it brings into question the financial, monetary, production and commerical mechanisms that...support the world economy.

"These are proving incapable either of remedying the unjust social situation inherited from the past or of dealing with the urgent challenges and ethical demands of the present," he wrote.

But the Polish Pope, who spent his life before his election last September as a prelate in communist Poland, made it clear he was not opposed to capitalism as a whole. The laws of healthy competition must he allowed to lead the way.

But the Pope also called for "a wider and more immediate redistribution of riches" and "daring creative resolves in keeping with man's dignity."

Such measures, he added. would help poor countries to satisfy their essential needs and make gradual but effective prog-

"But instead of hread and cultural aid," the Pontiff complained. "the new states ... are heing offered, sometimes in abundance, modern weapons and the means of destruction.'

'We all know that the areas of hunger and misery on our globe could have heen made fertile in a short time if the gigantic investments for armaments at the service of war and destruction had been changed into investments for food at the service of life."

in an apparent allusion to communist governments, the Pope facing the new head of state. In the key Sao Paulo industrial

belt, more than 200,000 metal workers were striking for higher pay as were 82,000 teachers in government schools in Rio de Janeiro state.

also denounced atheistic regimes which made believers second-

"It is difficult...to accept a posinon that gives only atheism the right of ciuzenship in public and social life while believers are, as though by principle, barely tolerated or are treated as secondclass citizens." be said. Believers power. have even entirely deprived of the rights of citizenship, the Pope added.

He did not go into details although, in an apparent allusion 10 his East European background. be said he would have a special right and duty to do so.

The Pope renewed the church's appeal to governments to respect the rights of religion and of church activities without giving any

In a philosophical comment on modern mankind, John Paul asked whether all the technological and economic progress of the world was making people morally better--and gave a negative response.

"Is man becoming truly better, more mature spiritually...more responsible, more open to others and especially the needlest and the weakest?" he asked. "Is there a growth of social love. of respect for the rights of others ...?

The Pope concluded that mankind in the modern world was "far removed from the objective demands of the moral order, from the demands of justice and still more from social love."

Defending the role of the individual, the pope asserted that 'mankind cannot become the slave of things, the slave of economic systems, the slave of production...A purely materialis- SAN SALVADOR, March 15 Insinca, a negotiated settlement The calier said the bodies of the tic civilisation condemns man to

such a slavery." The Pope spoke optimistically about the state of the Roman Catholic Church, which has been shaken by disagreements between "Progressives" and "con-

servatives." He placed himself squarely behind the reforms of the 1962-65 Vatican Ecumenical Council and asserted that despite internal difficulties and tensions the church "is now more united in the fellowship of service..."

He reaffirmed his advocacy of collegial, or more democratic, church government with the Pope aided by his Synod of Bishops and local churches associated with local synods.

ning at an annual rate of more than 40 per cent, and reduce the gulf between Brazil's rich and

General Figueiredo, until a year ago Brazil's intelligence chief, has pledged to continue cautious political reforms and pave the way for the return of democratic institu-

These were wiped out in 15 years of military rule that followed the outster of Mr. Joao Gonlart's left-leaning government.

Ostensibly the military took power to end widespread corruption and the takeover was widely supported, especially since the new rulers promised to maintain democratic institutions.

But these were gradually eroded over the years as the regime adopted repressive measures to combat an upsurge of extreme left-wing violence.

At the beginning of their terms. General Figueiredo's four military predecessors promised that civilian rule would be restored, but all failed to keep their word.

Outgoing President Geisel. however, has introduced important political reforms and allowed such a degree of freedom that hopes are higher than ever that the military may withdraw from

Even his most outspoken critics grudgingly admit that the political situation is better than when the 70-year-old president tonk office five years ago. One of President Geisel's most

notable achievements has been abolition of the hated Institutional Act, which gave the president virtual dictatorial powers allowing bim to close congress, rule by decree and deprive politicians of their rights.

Other much-applauded reforms included lifting press censorship and ending torture of political prisoners by military police. But General Geisel has never

hesitated to use his considerable powers when the government or its policies are threatened. In 1977, when the only legal

opposition party, the Brazilian Democratic Movement (MDB), appeared likely to make sweeping gains in future elections, President Geisel simply altered the constitution on voting rules to ensure that the pro-government National Renewal Alliance (Arena) would control the state governorships

S. Africa: Former official said to have details of political payoffs

JOHANNESBURG, March 15 (R) - Dr. Eschel Rhoodie, a key figure in South Africa's "slush money" scandal, has details of bribes paid to top politicians in Africa, the West and perhaps even the West, according to an interview published

In the interview, with the magazine Fmancial Mail, South African businessman Mr. Josias Van Zyl said the information held by Dr. Rhoodie would make the Lockheed aircraft scandal book like a Sunday school picnic."

Mr. Van Zyl was involved with General Hendrik Van den Bergh, retired head of the South African Bureau for State Security, in a trip to Paris last week to meet Dr. Rhoodie, who headed the government's non-disbanded Information Department.

They said they had persuaded him not to nisclose what he knew offering him a job promoting a steel-cutting process developed by Mr. Van ZvI's

But yesterday both General Van den Bergh and Mr. Van Zyl -- who insisted their Paris trip bad no government backing - had their passports seized by security police.

Mr. Van Zvl told the Financial Mail he was afraid the deal with Dr. Rhoodie might now fall through because he could not travel overseas to

"The only conclusion I can come to is that Dr. Rhoodie is going to implicate a number of people throughout the Western world and elsewhere." he said. "He might get a staggering amount of money for that information. But is be going to take the risk of having his head blown off for a fat bank

Without elaborating, Mr. Van Zyl said the most worrying material possessed by Dr. Rhoodie was related to psychological warfare affecting South Africa and its "international friends." He added :

Bribes form part of it, but they aren't necessarily the key. I have seen staggering things."

Dr. Rhoodie exiled himself from South Africa last November -- just before a judicial commission

published findings of a probe into suspected mis-

use of funds by his department. The commission's report said Dr. Rhoodie, whose department had charge of South African propaganda, was deeply involved in the scandal along with General Van den Bergh and former

Information Minister Connie Mulder. In a series of newspaper interviews published here. Dr. Rhoodie has said the entire cabinet knew about his department's secret projects -- a ciaim denied by Premier Pieter Botha and ministers who were named.

Dr. Rhoodie was quoted in the Rand Daily Mail today as saving one of his missions while he headed the department was to try to see the late Pope Paul in an attempt to stop the Roman Catholic Church "interfering" in South African

He said he failed to meet the Pope, who was already ill, but had "a long session with the Vatican secretar, of state."

Dr. Rhoodie said the secretary of state agreed it was not church policy to get involved in local politics. But he said that the situation in South Africa was different and it was hard to draw a line between politics and social responsibility.

## Grenada's new leader focuses on winning international recognition

ST. GEORGE'S. Grenada, the next few days. He said taking March 15 (R) -- Grenada's new revolutionary government has begun concentrating on winning international recognition, especially from the Non-Aligned movement, after a one-day coup which swept opposition leader Mr. Maurice Bishop to power.

Mr. Bishop, who quickly promised fresh elections, has already telephoned most Caribbean leaders to explain the circumstances of the left-wing coup that overthrew Premier Sir Eric Gairy on Tuesday and to assure them of Grenada's support for Caribbean unity.

A representative of Mr. Bishop will fly to Barbados today for talks with Caribbean leaders meeting there to discuss the implications of the lightning coup. The ministers have already called for an early return to constitutional government in Grenada.

Another representative went to New York yesterday to contact Third World U.N. members in an effort to win support for the takeover.

Mr. Bishop has promised to announce his government within

## U.N. declares massacre of **Armenians to** be genocide

GENEVA. March 15 (R) -- The United Nations Human Rights Commission overruled objections by Turkey and Pakistan vesterday to declare the massacre of Armenians in 1915 and 1918 as geno-

The commission accepted a report which said that the killings, carned out during the rule of the former Ottoman Empire, were the first case of genocide in recent his-

In the past the commission had

dropped all reference to the mas-

sacres in which between 1.2 miltion and 1.6 million Armenians. died according to Armenian emigre sources in Europe. The Turkish Government

argued that the killings in what is now Turkey's Anatoly Province were not genocide as ethnic Turks were among the dead.

Pakistan argued that retaining the paragraph about Armenian genocide, far from bringing back to life those who had died, would instead strain political relations between states.

But Australia, Austria, Cyprus, France and the United States insisted that it was historically correct to do so, and Commission Chairman Yvon Beaulne of Canada said he had received many letters urging that the reference to Armenian genocide be retained.

Armenian separatist groups protesting about deletion of the reference in the past have claimed responsibility for two bomb attacks against Turkish property in Geneva during the last four

# Putting waste heat to work

By Brian Groom

LONDON -- A considerable number of eels from Britain have recently been finding their way on to the dinner tables of the Low Countries. Nothing remarkable about that, it might be said, but those eels - along with tomatoes and oysters and experimental turbot, sole, prawns, cucumbers, peppers and possibly cbrysanthemums -- have in some parts of the world been grown with the help of reject heat from power stations.

The developments have been met in the British press with wry wit and comments about "coalpowered tomatoes", "nuclear cucumbers" and, inevitably, the "electric eel".

However, schemes being operated in Britain, France, North America and behind the Iron Curtain could he crucial to the survival of non-essential parts of the developed world's varied diet when the much talked-of energy crisis finally comes.

Around four per cent of a houses are part of integrated develped country's energy is used zone, to produce in Britain's case iust over balf the nation's food supply. It does not take much foresight to see that such nonessentials as the glasshouse industry would go to the wall if the use of fossil fuels was limited.

Countries learn from each other. Britain's Express Dairies has just begun a project at Drax power station, in Yorkshire. Mr. Tony Good, the company's chief executive, said: "In Eastern bloc countries, they have 500-acre greenhouse farms using waste hot water from industrial concerns. It occurred to us that we could do the same here."

In Romania, for instance massive glasshouse collectives are sited next to the place of power generation. Hungary is planning dry cooling systems for power stations which will link with glass-

The crucial difference is that

industrial systems, with factories in agriculture, if it is in a temperate built alongside power plants, and dry heat provides temperatures of 120 degrees centigrade--a far cry from the lukewarm waste heat from recycled cooling water used elsewhere.

The West has one muchpublicised similar scheme in the British county of Hereford, where a 15-megawatt power station is being built next to H.P. Bulmer's cider-making plant and the Sun Valley poultry processing unit. The companies will buy the entire output of waste heat for use in processing apples and chickens.

A British Governmentsponsored working party has been investigating the prospects for combining heat and power on a larger scale, but the difficulties in countries which lack overall economic planning are immense. Smallish power stations are essential to schemes like this, but Britain's Central Electricity Generating Board is loth to abandon its this is not reject heat. The glass-philosophy of building 2,000-

As fuel costs threaten to rise again. researchers are looking at ways of exploiting waste heat from power stations, other industrial plants and natural sources. Their findings may influence our diet in a few years' time.

megawatt stations away from population centres.

Most successful Western food production schemes use power station cooling water, which bas a low temperature but is dependable--and will last as long as countries generate power.

During a British power workto-rule at the end of 1977, the press got the idea that eels were dying of the cold. In fact, they simply stopped growing since the purpose of the heat is to fatten them for early sale.

Fish farming by this method. however, may have only limited

prospects. For one thing, the capital costs are high and the profits a long time in coming. For another, fish farms can use only the small "bleed-off" (water removed daily from the cooling system) because of the nitrogen created by the fish. But new schemes are progressing.

Agricultural uses are the most

popular. In the United States, the

Northern States Power Company

has a well-advanced glasshouse

experiments in growing the usual crops are carried out. There is another scheme in Alabama.

In France, use is being made of Electricite de France nuclear power stations, particularly at St.-Laurent des Eaux and at Cadarache. One problem with the French schemes is that they have been using electric heat pumps, which goes a good way to nullifying waste beat as an energy

Experiments in alternative energy sources are going ahead in many countries. Geothermal energy is used to heat glasshouses in New Zealand, and heats the whole of Iceland's glasshouse industry. It is at an earlier stage of development in northern France

pumping stations, with beating pumps driven by the exhaust from gas turbines. None of the ideas seems as serviceable as power station waste heat, however. Even then, much of the impetus is coming from researchers in the field, rather than from government or the glassbouse industry itself, which seems to need dire economic necessity to force it into radical

change, despite the potential sav-

ings. Energy accounts for 24-25

per cent of glasshouse costs. "I find that a very narrow view. We ought to be developing now for when industry needs it, says Mr. G.F. Sheard, former deputy director of Britain's Glasshouse Crops Research Institute, citing as an example the radical Dutch success in relocating large parts of the glasshouse industry round the Hague.

Time may be shorter than the industry thinks before many luxury, non-essential and outof-season foods on the developed countries' menus disappear into the coming energy gap.

Japan proposes new energy-saving program TOKYO, March 15 (R)-Japan today tightened its energy servation measures, calling for shorter television broadcasting early closing of bars and night clubs, and the closing of petrolion Sundays and holidays, a government spokesman said. The ures, adopted by a ministerial council and expected to be an tomorrow by the cabinet, also require government offices to summer air conditioning and cut by 20 per cent the use of cars. The programme will help Japan to save at least 94.5 barrels of oil, about five per cent of annual consumption, in ) a recent International Energy Agency (IEA) decision in Pa IEA agreement follows cuts in oil supplies from Iran and deci several leading oil suppliers to reduce shipments. The I programme, similar to measures adopted after the 1973 of not mandatory, expecpt for government officials, who have been asked to use cars sparingly.

Shah's eldest son joins family in Moroci RABAT, March 15 (R)--The Shah of Iran's eldest son, 18-y Prince Reza Pahlavi, bas arrived in Morocco from the Unite to join his parents, an Iranian source said in Rabat yesterday. source denied that the prince had come to Morocco bec father was seriously ill. Iranian sources here have said the S been suffering from blood circulation problems. Prince Rewas groomed from early childbood to take over the throne w Shah was forced to abandon in January, completed his pilot's at the Reese air base in Lubbock, Texas last week. The S Empress Farah have been in Morocco since January 22, stayl Dar es Salaam palace on the outskirts of the capital. The pa placed at the Shah's disposal by King Hassan. The Shall youngest children are also staying with him.

· Muhammad Ali intends to keep them gues SYDNEY, March 15 (R)-Three-times world heavyweight ion Muhammad Ali today continued to keep the world whether be was going to retire from boxing. "I have until Se either announce my retirement or announce a title defence? said after arriving from the United States for his exhibition fig. Jimmy Ellis and Joe Bugner here on Sunday. "I might do: intend to keep the whole world guessing." the champion ad Ali estimated that, at 37, he had earned over \$50 mills boxing. "When I do retire," he said, I plan a world-wide orga to help the poor," Soviet leaders Leonid Brezhney, Unite President Jimmy Carter and evangelists Billy Graham a Roberts had promised to help, Mr. Ali said. But the organical would be non-political and non-denominational. Mr. Al other questions about his future by saying he could continu money from exhibition bouts for another ten years. He was his hotel in a motorcade with a police escort.
